

Contents

Abbreviations	iv
1 Introduction	1
2 Basic Theory and Simulation Techniques	7
2.1 Maxwell Equations	7
2.2 Linear Optics	9
2.2.1 Refractive Index and Indicatrix	9
2.2.2 Linear Optics on Microscopic Scale	11
2.3 Nonlinear Optics	13
2.3.1 Second-Order Nonlinear Polarization	13
2.3.2 Second-Harmonic Generation	14
2.3.3 Electro-Optic Effect	16
2.3.4 Nonlinear Optics on Microscopic Scale	17
2.4 Dielectric Slab Waveguide	20
2.4.1 Helmholtz-Equation	20
2.4.2 Asymmetric Dielectric Slab Waveguide	20
2.5 Photonic Crystals	24
2.5.1 Periodic Dielectric Media	24
2.5.2 One Dimensional Photonic Crystals / Transfer-Matrix-Method	26
2.5.3 Two Dimensional Photonic Crystals	34
2.6 Resonant Structures	41
2.6.1 Basic Properties of Optical Resonators	42
2.6.2 Classical Fabry-Perot-Resonator	44
2.6.3 All-Dielectric Fabry-Perot-Resonator	46
2.6.4 The Photon Lifetime Model	48
2.6.5 Incoherently Coupled Fabry-Perot Resonators	49
2.6.6 Electro-Optical Modulation of Resonators	50
3 Materials	55
3.1 Polymeric Core Materials	55
3.1.1 General Properties	55
3.1.2 P(MMA/DRMA-10)	61

3.1.3	CLD-1/APC	64
3.2	Substrate Materials	65
3.2.1	General Remarks	65
3.2.2	Teflon	65
3.2.3	SBA-15F	66
3.2.4	Dendriglass	67
4	Experimental Methods	69
4.1	Sample Preparation Techniques	69
4.2	High-Field Poling	73
4.3	Characterization Setup	76
4.3.1	Prism Coupler	76
4.3.2	Transmission Setup	77
4.3.3	Photobleaching Setup	80
4.3.4	Electro-Optic Modulation Setup	81
4.3.5	Mach-Zehnder-Interferometer	82
5	Results and Discussion: Simulations	85
5.1	One Dimensional Photonic Crystal	85
5.1.1	Bragg-Stack	87
5.1.2	Bragg-Stack Cavity	91
5.1.3	Multicavity Bragg-Stack	98
5.2	Photonic Crystal Line Defect Resonators	100
5.2.1	General Transmission Properties	102
5.2.2	Cone-Shaped Holes	106
5.2.3	Lattice Engineered Line Defect Resonator	108
5.3	Photonic Crystal Ridge Waveguide Resonator	111
5.3.1	Regular Photonic Crystal Ridge Waveguide Resonator	113
5.3.2	Lattice Engineered Photonic Crystal Ridge Waveguide Resonator	115
6	Results and Discussion: Experiments	119
6.1	Teflon Based Polymeric Photonic Crystals	119
6.1.1	Regular Photonic Crystal Structures	119
6.1.2	Photonic Crystal Line Defect Resonators	121
6.2	Quasi-Air-Bridge Photonic Crystals	127
6.3	Spectrally Adjustable Photonic Crystals	133
6.3.1	Bulk Photonic Crystal Structures	133
6.3.2	Line Defect Resonators	138
6.4	Electro-Optically Active Photonic Crystals	140
6.4.1	High-Field Poling	140
6.4.2	Electro-Optic Modulation of Poled Photonic Crystals	143
7	Conclusion and Outlook	153

<i>CONTENTS</i>	iii
A Influence of Non-Normal Incidence	159
